20. (Cancelled)

21. (Currently Amended) A computer server for hosting a system for shopping in a physical retailer and online, the server comprising:

a processor; and

a database accessible to the processor;

the processor being programmed to:

download data representing one or more items from a handheld data entry unit to the database;

create a wish list from the data downloaded to the database, the wish list including the one or more items;

provide a web site that is in communication with the database, the web site allowing a user to generate one or more buy lists, each buy list including one or more of the one or more items from the wish list; and

transmit a message to a buyer in order to inform the buyer of the existence of one or more of the buy lists; and

receive wish list updates from a concierge service;

wherein the concierge service is authorized by the buyer to purchase selected items from physical stores; and

wherein the concierge service manually updates the wish list after the selected items are purchased.

22. (Original) The computer server of claim 21, the processor being further programmed to:

allow the user to create an access mechanism that identifies a list of buyers that are allowed to access one or more of the buy lists; and

transmit, a message to at least one of the listed buyers in order to inform the listed buyer of the existence of one or more of the buy lists.

23. (Original) The computer server of claim 22, the processor being further programmed to allow the user to electronically request at least one of the listed buyers to purchase one or more of the items on the buy list.

24. (Original) The computer system of claim 22, wherein the access control mechanism is selected from the group consisting of an access control list, password protection, public access and private access.

25. (Cancelled)

26. (Original) The computer server of claim 21, the processor being further programmed to allow the user to add additional items to the wish list by shopping at electronic retailers.

27. (Original) The computer server of claim 21, the processor being further programmed to:

link at least one of the buyers to the web site; and

display a web page containing the buy list corresponding to the at least one buyer.

28. (Currently Amended) A method of receiving and communicating a list of one or more items over the Internet, the method comprising:

downloading data representing the items from a handheld data entry unit to a database;

creating a wish list from the data downloaded to the database, the wish list including one or more of the items;

providing a web site that is in communication with the database, the web site allowing a user to generate one or more event lists, each event list including one or more of the items from the wish list;

allowing the user to create an access mechanism that identifies a list of users that are allowed to access one or more of the event lists; and

transmitting a message to at least one of the listed users in order to inform the listed user of the existence of one or more of the event lists

providing a concierge service for the manual purchase of selected items from physical stores;

providing the concierge service with purchase choices from the listed user;

purchasing selected items from physical stores;

manually updating the wish and buy lists;

wherein the concierge service updates the wish and buy lists after purchasing the items from physical stores on behalf of the listed user.

29. (Cancelled)

30. (Currently Amended) An Internet based method of receiving and communicating a list of one or more items over the Internet, the method comprising:

providing a web site having a user interface including one or more user windows, the one or more windows providing an event list screen and a wish list screen;

retrieving a list of one or more items;

arranging the one or more items into one or more wish lists on the wish list screen;

entering one or more events into an event list on the event list screen;

assigning one or more of the items from the wish list to one or more of the event lists;

creating an access mechanism that identifies a list of buyers that are allowed to access one or more of the event lists; and

transmitting a message to at least one of the listed buyers in order to inform the listed buyer of the existence of one or more of the event lists;

providing a concierge service for the manual purchase of selected items from physical stores;

providing the concierge service with purchase choices from the buyer;

purchasing selected items from physical stores;

manually updating the wish and buy lists;

wherein the concierge service updates the wish and buy lists after purchasing the items from physical stores on behalf of the buyer.

31. (Original) The Internet based method of claim 30, wherein the one or more windows provide a registration screen.

32. (Original) The Internet based method of claim 31, further including allowing a user to enter registration information on the registration screen to allow access to the event list screen and the wish list screen.
